Intramuscular Injection Simulator - Upper Arm

PRODUCT ID	1009840
WEIGHT	0.898 kg
DIMENSIONS	32 x 14 x 12 cm
BRAND	3B Scientific Germany

KEY FEATURES

- The built-in fine electronics produce audio-visual feedback of the result, e.g. correct or incorrect injection, bone contact, or wrong location.
- Trainings and control modes optionally provide an immediate or subsequent performance check under training conditions.
- I.M. simulator represents a right upper arm with all important anatomical palpable landmarks such as acromion and humerus.

PRODUCT DETAILS

This high-quality I.M. simulator represents a right upper arm with all important anatomical palpable landmarks such as acromion and humerus. The realistic anatomy allows for placing correct intramuscular injections in an exceptionally graphic way. The built-in fine electronics produce audio-visual feedback of the result, e.g. correct or incorrect injection, bone contact, or wrong location. Additional trainings and control modes optionally provide an immediate or subsequent performance check under training conditions. The included lifelike silicone skin is extremely durable and can be quickly and easily exchanged when necessary.

The intramuscular simulator is supplied with:

- 2 AA batteries
- detailed instruction manual
- replacement skin
- 5-ml injection syringe
- 21G/0.8 injection needle

Intramuscular injection can be practiced realistically without a real patient!
